- Spending Pattern
- Transaction Monitoring
- Occupation
- Age Group
- Fraud Detection

Offers Four Credit Card Types

BLUE

GOLD CREDIT CARD

PLATINUM CREDIT CARD

SILVER CREDIT CARD

Presented by : Sheetal Sharma

PROBLEM STATEMENT

Financial institutions generate large volumes of credit card transaction data but often struggle to extract meaningful insights from it. Aurum Wave Bank needs a data-driven analysis to understand customer spending behavior, revenue generation patterns, and risk factors across different credit card categories. The challenge is to identify key trends in transactions, customer demographics, and payment methods to improve business performance. This project aims to analyze these factors using Power BI to support better decision-making, optimize revenue, and enhance customer retention.
